WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Temperatures will continue to cool off substantially over the next couple of days as an upper level trough shifts over the Pacific Northwest. Winds will become much lighter at the coast Thursday with more low clouds and fog.

San Francisco Weather:

Onshore winds and a deep marine layer will keep temperatures near normal through the end of the week. Temperatures warm inland over the weekend while low clouds persist at the coast.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY

Sacramento Weather:

Continued cooler onshore flow today and Friday as a low pressure system moves through the Pacific Northwest. Coastal stratus will move into the delta and southern Sacramento valley night and morning hours with a moderate to strong delta breeze expected to continue through this evening. Warmer temperatures are expected over the weekend and into early next week as flat high pressure moves across the region. Temperatures are expected to stay above normal through the remainder of the week.

Hanford Weather:

A westerly wind aloft will allow for a continued slight cooling trend. This westerly wind is expected through the week achieving near normal temperatures for the weekend.

WEATHER SYNOPSIS BY REGION: (Cont.)

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Night through morning low clouds and fog will continue into next week. Nighttime temperatures will remain warmer than normal due to the overnight cloud cover. Daytime temperatures will fluctuate a bit depending on how soon it clears, but remain around normal.

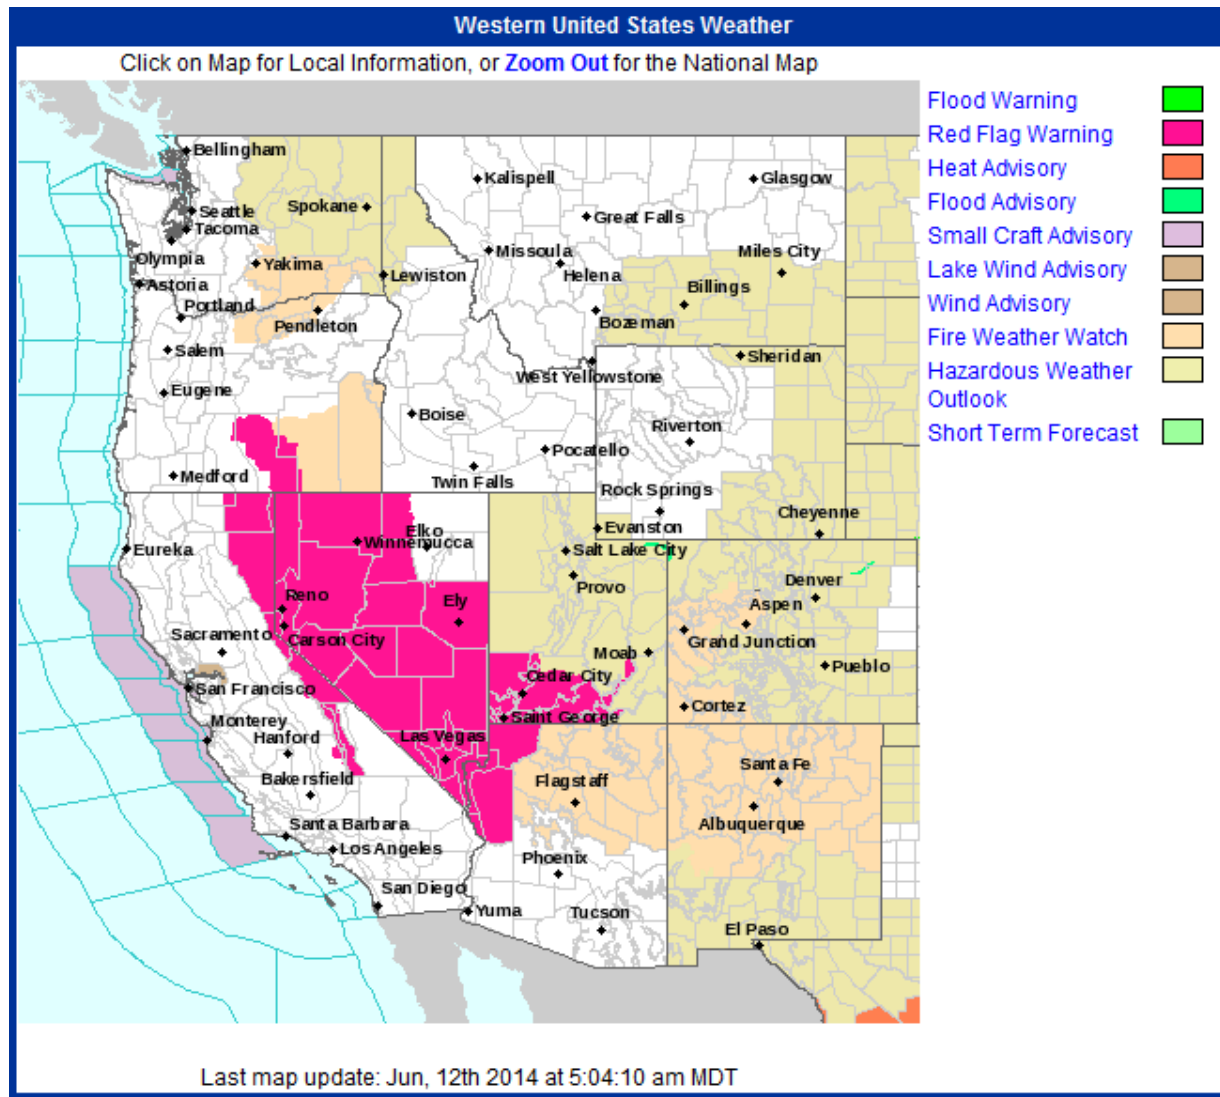

Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

Little variation in the weather is forecast through the middle of next week as a west coast trough persists. Marine layer clouds will extend into the valleys each night and morning. Gusty west winds will continue through the passes and deserts slopes at times during the afternoons and evenings, strongest Friday. High temperatures will remain near to slightly below normal through the forecast period.

Southeast California Weather:

Strong high pressure centered over northern Mexico will maintain near to above normal temperatures and very dry conditions into next week with only slight fluctuations in temperatures expected each day.

Cal EOC Incident – 2014 Drought

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue without substantial rainfall, severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

****As our state's rainy season comes to an end, it is highly unlikely that precipitation totals will increase significantly. This winter's below average rain and snowfall worsens conditions in this third straight dry year.***

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

Situational Summary (Cont.)

- The Taskforce continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- The final manual snowpack survey of the season was conducted on Thursday (May 1) and showed California snowpack at 18% of normal. A more recent update using automated devices shows snowpack at 0% of normal as of June 3.
- DWR has announced that water essential for health and safety will be delivered through the state water project. The current State Water Project Allocation is 5%.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
